

HOW HIGH YOU CAN FLY

Way hey ya hey ya, Wey hay i-oh, Way hey ya hey ya, Wey hay i-oh,
Way hey ya hey ya, Wey hay i-oh, Way hey

Close your eyes and go within, let me tell you what's happening
You're leaving time your leaving space, and you're ready to take flight
It's a calling from universe forget your problems forget the earth
Step into the atmosphere where anything is possible

Did you know that you've got wings, and you can do anything?
Did you know you were meant to fly, and you're ready to take flight?
Did you know that you've got wings, and you can do anything?
Did you know you were meant to fly, and you're ready to take flight?

And I want you to know how high you can fly, how high you can fly, how high you can fly
And I want you to soar and take to the sky, and take to the sky, and take to the sky
And I want you to know how high you can fly, how high you can fly, how high you can fly
And I want you to soar and take to the sky, and take to the sky, and take to the sky

Way hey, wey hay, oh way hey, Way hey, wey hay, oh way hey,

Close your eyes and look within, let me tell you what's happening
You're leaving time your leaving space, and you're ready to take flight
It's a calling from universe forget your problems forget the earth
And step into the atmosphere where anything is possible

Did you know that you've got wings, and you can do anything?
Did you know you were meant to fly, and you're ready to take flight?

And I want you to know how high you can fly, how high you can fly, how high you can fly
And I want you to soar and take to the sky. take and to the sky, and take to the sky
And I want you to know how high you can fly, how high you can fly, how high you can fly
I want you to soar and take to the sky. take to the sky, take to the sky

Way hey ya hey ya, Wey hay i-oh, Way hey ya hey ya, Wey hay i-oh,
Way hey ya hey ya, Wey hay i-oh, Way hey
